

FAQ

Which Wilflex™ ink products are CPSC compliant?

Our industry leading Epic™ (non-phthalate), Oasis™ (water based) and Ecolution™ (non PVC, non-phthalate) lines are designed to meet or exceed the CPSC regulations.

Is an MSDS enough proof to show that my product is compliant?

No. You must provide testing data from an independent, CPSC approved and accredited lab.

How can I find a “CPSC approved accredited lab” to undergo third party testing?

There is a list of laboratories on the CPSC website:

<http://www.cpsc.gov/cgi-bin/labsearch/>

Where can I receive more information on this?

Specialty Graphic Imaging Association (SGIA) has issued a number of CPSC Fact Sheets (see attached).

CPSC website information on third party testing requirements:

<http://www.cpsc.gov/about/cpsia/labaccred.html>

How can I contact PolyOne for additional information?

Contact Wilflex Technical Services.
