

ONYX

ONYX 21

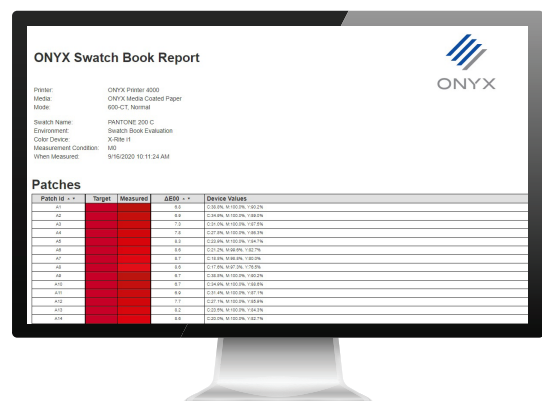

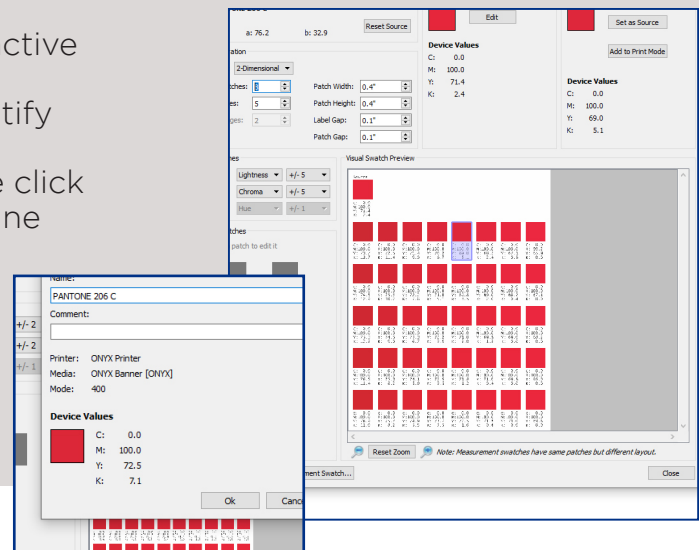

A faster, easier way to match color

ONYX 21 Introduces new tools for a faster, easier way to match color, streamline tile job workflows, with new dynamic print label capabilities.

Swatch Books 2.0

A new interactive visual workflow to print, scan, iterate and report on the ideal color match with options to add print defined colors in a single click

- Easily select swatches from all new interactive interfaces for visual or scanned swatches
- Generate scanned swatch reports to identify the best color match
- Add print mode defined colors in a single click
- Quickly iterate off selected swatches to fine tune color matches

PDF Tile Maps

Intuitive PDF Tile Maps streamline tile job workflows and help guide installation with the ability to easily produce tile maps before, during and after printing or automate using ONYX Quick Sets.

- Produce color managed tile maps including tiling lists
- Be organized, accurate and efficient with a portable PDF used for, installation, customer transparency and print job previews
- Automate tile maps on any job using ONYX Quick Sets
- Easily see which tiles should be reproduced for future prints

New Dynamic Print Label Capabilities

New dynamic print label capabilities in ONYX 21 deliver innovative tools for print shop branding and flexibility to connect to existing business tools.

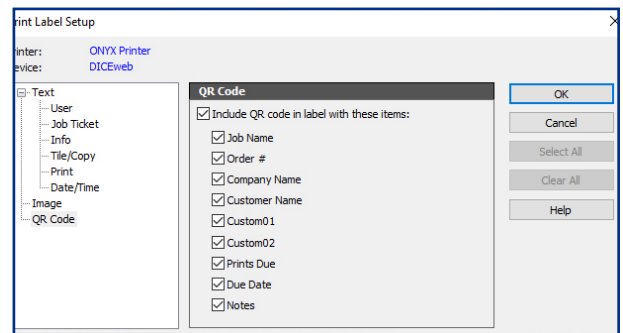

- Add images to print labels on any print, including logos to increase brand visibility
- Rotate print labels 180 degrees on banners and canvas prints
- Generate dynamic QR codes with important job information
- Connect with existing business tools using Barcode images and QR codes

100% Adobe power throughout

ONYX 21 utilizes the latest Adobe technology including new Adobe PDF Converter APC 3.1.
