

## MagnaPrint® Bling Range

### Ready to use Metallic Printing Pastes

MagnaPrint® Bling products are a ready to use metallic print pastes that has excellent shine and elasticity.

The range consists of the following products:

- MagnaPrint® Bling Silver
- MagnaPrint® Bling Gold
- MagnaPrint® Bling Bronze

### Application

MagnaPrint® Bling products should be printed through a 3261 (86  $\text{\textcircled{E}}$ 156) mesh screen with rectangular profile squeegees. As the particle size is 10-60 micron this should be considered when selecting screen mesh.

When printing as part of a multicoloured design print the MagnaPrint® Bling products as the last screen to avoid pick up.

After printing the garment/panel should be cured, ideally for 2 $\frac{1}{2}$  minutes @165°C (330°F).

All information is given in good faith but without warranty. They do not release you from testing our products as to their suitability for the intended processes and uses.
